

Founded in the year **1967**, **Purushottam Agencies** is a leading professional sales company that supplies and trades in most advanced quality of PVC Shrinkable Sleeves, Reverse Printed labels, BOPP Wraparound Labels, 20 litres Jars and dispensers, Pet preforms, BOPP Adhesive Labels and many other packaging solutions. We also manufacture pet bottles from Single Stage ASB Nessai machine especially for pharmaceuticals and cosmetic industries.

The company is pioneer in marketing of PVC heat shrinkable labels & sleeves in Eastern India & Nepal for three decades. That is not all. We are importers & stockist of various heavy chemicals especially for dry cell batteries. Our commitment and sense of togetherness with clients has made us the oldest and most trusted suppliers of Packaging materials.

We are proud channel partners of Eastern India's largest and most acclaimed manufacturer of PVC Heat Shrinkable Sleeves, Labels, Tubes and Films - M/s Vintech Polymers Pvt. Ltd. Their quality assurance and our marketing expertise is a win-win combination, strengthening our presence in the packaging industry.

The company is proud of its team of veterans and technicians who are in tune with the latest trends. We are committed to achieve customer satisfaction by supplying premium quality products and services, adhering to customers' delivery requirements and also ensuring continuous improvement.

Our Mission –

Being a technically advanced organization which is ready to serve the toughest of the industrial challenges.

Our Competitive Advantages –

- Imported film extrusion plants
- Multiple rotogravure printing press for multicolor printing
- High speed inspection and doctoring machines
- Slitter rewinder machines
- Hotmelt adhesive coating and hologram applicator machines
- High speed sleeving& cutting machines
- Research & Development department
- Designing and prepress studio
- Customer Support cell

PVC Shrink Film

Plain Shrink Film is available in Blown form as well as Calendered / Cast form. Applications decide the type of film to be used.

Blown Seamless PVC Shrink tubing can be produced in widths from 12mm to 750mm layflat and thicknesses from 25 microns to 300 microns. These are mostly used in applications for electrical insulation like busbars, in packaging for barriers to liquids, in printed body labels or holographic sleeves, security sleeves, bands etc. in the form of rolls, cut sleeves, sealed pouches, preformed cups etc. Cross Shrinkage upto 55% can be easily achieved in Blown Shrink Film.

Calendered film / Cast film are used where higher shrinkages are required up to 65%. The applications remain the same. These films cannot be produced in seamless form.

PVC Shrink Labels

PVC Shrink Labels or Body sleeves offer many advantages over other forms of labelling. They can be used on odd shaped containers, are scratch proof, offer high resolution graphics across the entire body of the container, are applied easily by hand held hot air blowers or

sophisticated shrink tunnels, ensure high speed labeling on automatic applicators, work efficiently in cold environments

where other labels may turn soggy and fall off, can be laminated with holographic strips to prevent duplication, can be applied with hot melt adhesives to prevent rotation around containers and many more such advantages.

We offer widths from 12mm to 450mm in various thicknesses in the form of Rolls, Cut Sleeves, Pouches and Preforms. We can print up to 8 colours on High Speed Automatic Rotogravure Printing Presses. With excellent infrastructure and highly sophisticated upstream and downstream equipment we possess the strength to produce world class shrink sleeves.

Shrink Tunnel Machine

Shrink Tunnel Machines are best known for their longer service life, accurate performance and low power consumption. The use of shrink labeling machines saves time and hence, enhances the production

capacity. Easily operable, these machines unwind systems without facing any difficulty in operation.

Used in Following Industries:-

- Food & Beverages
- Dairy Products
- Liquor & Fruit Juice for packing

BOPP Adhesive Tapes

Wrap around labels are roll fed labels available in oriented poly propylene in pearlescent white opaque or natural transparent. We offer oriented polypropylene roll fed labels for 360 degree, full body wrap around labeling of carbonated soft drinks, pet water bottles, beverage, coffee and food products. Our in-house label designers can help maximize our 10 colours printed graphics and make your products attractive on the shelf. Label thickness ranges from 35 to 70 microns.

Pet High Shrink Film

Garware

Garfilm High Shrink is Mono-Axially oriented Co-Polyester based film with more shrinkage in transverse direction.

The film is coated PT814 for better frictional & handling properties.

This film is specially designed for outer wrapping & labeling of PET & Glass bottles, Cans and various other kind of containers with complex shapes in form of sleeves & cap seal stock.

Pet Bottles

A highly advanced technology, using single stage ASB stretch blow machines, is adopted for manufacturing optimum quality product. We are successfully catering to the requirements of pharmaceutical, cosmetic, pesticide and liquor industries for more than a decade.

Our high standard products and timely services has induced growth and acceptance In the packaging industry.

Chemical

- Zinc Chloride
- Mercuric Chloride
- Boric Acid

- Borax
- Magnesium Sulphate
- Manganese Dioxide
- Dry Cell Battery Chemicals & Materials.

Stretch Film

By combining a variety of materials, resins and testifiers with stretch film's basic building block, polyethylene, different types of films have been developed to obtain a desired set of film properties. Your Signode salesperson carefully studies how your product is handled, stored, shipped and received in order to make the best possible recommendation for your operation.

LD Shrink film

With the aim of becoming the eminent name of the industry, we are engaged in offering LD Shrink Film. The product that we offer has been manufactured using high grade material. These products are admired for their premium quality. Our products have perfect as well as excellent finish. The offered products are made available in various sizes. Besides, these LD Shrink Films are available at economical rates.

Polyolefin Shrink Film

Polyolefin Shrink Film with high clarity makes the product more attractive, good protection. It protects products from dust, moisture and odors without compromising with the looks of the products. Is suitable for long shelf life and frozen products also. The Polyolefin Shrink Film we offer uses high quality polyolefin to manufacture these special quality polyolefin shrink films. These superior quality shrink films are made on high volume plants employing highest quality standards and hence can be used for a variety of packing applications. The standard form is one side slit (centre-folded) with perforation.
